NOTES: The team event was conducted simultaneously with the individual event from 1951 through 1966. The format was 36 holes of medal play on the same day. The first 18-hole round comprised the team score, using the best four cards to establish the total.

District III paused team championships from the 1966-1967 school year through the 2002-2003 school year, resuming in 2003-2004. From that year through 2009-2010, the district played the team championship separately from the individual championship and used five cards to compile the team score.

In 2010-2011, the district returned to four-card scoring, playing the team event separate from the individual championship through 2020-2021. In 2021-2022, the district played the team event simultaneously with the individual championship, using the first round 18-hole results to determine the scoring. That format is current.
